LinkedIn: linkedin.com/in/anshmishra 

Address: Hyderabad, Telangana

Mobile: +91-96431 14304

Email: anshmishra703@gmail.com 

D.O.B: 7th November 2003

EDUCATION

- Birla Institute of Technology and Science, K K Birla Goa Campus** Goa, India
Bachelor of Engineering - Electronics and Instrumentation May 2021 - August 2025
 - Modern Convent School** Delhi, India
10+2 PCM December 2021

TECHNICAL PROFICIENCY

- Languages** -: Python, Java, Bash
- Tools** -: Wireshark, ELK Stack, Metasploit Framework, nmap, SEToolkit, VirtualBox
- Skills** -: Threat Detection, Incident Response, Security Orchestration, DFIR, Team Leadership, Cross-team Collaboration

WORK EXPERIENCE

Enea AB Hyderabad, India
Security Analyst January 2025 – Present

- Overseeing traffic fingerprinting and real-time classification** for Security Center, the main corporate core firewall that handles high-throughput incoming international traffic for several significant international clients.
- Managing a security operations team**, setting operational KPIs, streamlining workflows for shift monitoring, and providing team members with cross-training to get 100
- Supervising the continuous analysis of complex data vectors**, driving targeted rule optimizations on the main firewall to maintain high infrastructure availability and robust threat-matching fidelity.

Enea AB Hyderabad, India
Security Analyst Intern June 2024 – July 2024

- Eliminated false positives** across high-volume traffic channels by evaluating 5 core filtering mechanisms and engineering an optimal multi-layered rule combination pairing Bitdefender telemetry with heuristic indicators.
- Improved alerting accuracy and operational efficiency**, by reducing firewall false positive rates from 2.55
- Developed a reputation-based, cost-free blocking system** using pre-existing WhoisXML API data to find fraudulent domain registrars, focusing on sites like NameCheap and NICENIC that showed up to 100% spam concentration

K2Cloud Gurgaon, India (Remote)
Cloud Infrastructure Intern May 2023 – June 2023

- Automated multi-tier web infrastructure deployment** through the use of Vagrant virtualization workflows in an isolated virtual machine environment to provision a strong LAMP (Linux, Apache, MySQL, PHP) stack.
- Set up port forwarding profiles and local network architecture** to safely expose virtualized web server endpoints, facilitating cross-environment accessibility and host-to-guest browser testing.

RELEVANT COURSES AND CERTIFICATIONS

- CompTIA Security+ (SY0-701)** 
 - Grade 5 Certified Drummer** – Rockschoool London Performance Arts Award
 - Ethical Hacking** – IIT Delhi Practical Offensive Security Training
 - IT Security Foundations** – LinkedIn Learning 
 - Cybersecurity Foundations** – LinkedIn Learning 
 - Regular Expressions** – LinkedIn Learning 

PROJECTS

Intelligent Humidistat (Microprocessors & Interfacing): Designed and built an embedded system utilizing microprocessor-driven sensor integration to execute real-time ambient environment polling. Implemented automated feedback control loops to dynamically regulate indoor humidity levels via automated humidifier orchestration.

Railway Reservation System (Object-Oriented Programming): Engineered a high-fidelity transactional system under Dr. Anita B. Agarwal using advanced OOP principles. Built robust backend logic to securely manage user authentication, concurrent ticket allocations, automated "Tatkal" dynamic pricing algorithms, and transactional state validation.

LEADERSHIP & EXTRACURRICULAR ACTIVITIES

Music Society, BITS Pilani Goa, India
Finance Coordinator August 2023 – May 2024

- Allocated and managed operational budgets** for major university live performances, driving sponsor relations and maintaining precise fiscal compliance across resource procurement pipelines.
- Coordinated cross-functional logistics** between technical infrastructure providers and artist management teams to ensure seamless event delivery and zero-deficit asset reconciliation.
