Address: Hyderabad, Telangana

Mobile: +91-96431 14304
Email: anshmishra703@gmail.com 
D.O.B: 7th November 2003

EDUCATION

- Birla Institute of Technology and Science, K K Birla Goa Campus**
Bachelor of Engineering - Electronics and Instrumentation
 - Modern Convent School**
10+2 PCM
- Goa, India
May 2021 - August 2025

Delhi, India
December 2021

TECHNICAL PROFICIENCY

- Languages** -: Python, Java, Bash
- Tools** -: Wireshark, ELK Stack, Metasploit Framework, nmap, SEToolkit, VirtualBox
- Skills** -: Threat Detection, Incident Response, Security Orchestration, DFIR, Team Leadership, Cross-team Collaboration

WORK EXPERIENCE

- Enea AB**
Security Analyst

Hyderabad, India
January 2025 – Present
- Directing real-time classification and traffic fingerprinting** for Security Centre, the primary enterprise core firewall managing high-throughput inbound global traffic for multiple major global clients.
 - Leading and mentoring a 3-member security operations team**, establishing operational KPIs, optimizing shift-monitoring workflows, and cross-training team members to achieve 100% telemetry coverage.
 - Supervising the continuous analysis of complex data vectors**, driving targeted rule optimizations on the main firewall to maintain high infrastructure availability and robust threat-matching fidelity.

- Enea AB**
Security Analyst Intern

Hyderabad, India
June 2024 – July 2024
- Eliminated false positives** across high-volume traffic channels by evaluating 5 core filtering mechanisms and engineering an optimal multi-layered rule combination pairing Bitdefender telemetry with heuristic indicators.
 - Reduced firewall false positive rates from 2.55% to 0.21%**, significantly improving alerting accuracy and operational efficiency.
 - Designed a zero-cost, reputation-based blocking framework** utilizing existing WhoisXML API data to identify malicious domain registrars, targeting platforms like NICENIC and NameCheap which exhibited up to a 100% spam concentration.

- K2Cloud**
Cloud Infrastructure Intern

Gurgaon, India (Remote)
May 2023 – June 2023
- Automated multi-tier web infrastructure deployment** by provisioning a robust LAMP (Linux, Apache, MySQL, PHP) stack using Vagrant virtualization workflows within an isolated virtual machine environment.
 - Configured local network architecture and port forwarding profiles** to securely expose virtualized web server endpoints, enabling seamless host-to-guest browser testing and cross-environment accessibility.

RELEVANT COURSES AND CERTIFICATIONS

- CompTIA Security+ (SY0-701)** 
 - Grade 5 Certified Drummer** – Rockschoool London 
 - Ethical Hacking** – IIT Delhi 
 - IT Security Foundations** – LinkedIn Learning 
 - Cybersecurity Foundations** – LinkedIn Learning 
 - Regular Expressions** – LinkedIn Learning 
- Performance Arts Award*
Practical Offensive Security Training

PROJECTS

Intelligent Humidistat (Microprocessors & Interfacing): Designed and built an embedded system utilizing microprocessor-driven sensor integration to execute real-time ambient environment polling. Implemented automated feedback control loops to dynamically regulate indoor humidity levels via automated humidifier orchestration.

Railway Reservation System (Object-Oriented Programming): Engineered a high-fidelity transactional system under Dr. Anita B. Agarwal using advanced OOP principles. Built robust backend logic to securely manage user authentication, concurrent ticket allocations, automated "Tatkal" dynamic pricing algorithms, and transactional state validation.

LEADERSHIP & EXTRACURRICULAR ACTIVITIES

- Music Society, BITS Pilani**
Finance Coordinator

Goa, India
August 2023 – May 2024
- Allocated and managed operational budgets** for major university live performances, driving sponsor relations and maintaining precise fiscal compliance across resource procurement pipelines.
 - Coordinated cross-functional logistics** between technical infrastructure providers and artist management teams to ensure seamless event delivery and zero-deficit asset reconciliation.
